

The background is a solid orange color with a pattern of thin, white, wavy lines that create a sense of movement and depth. The lines are more densely packed in some areas and more sparse in others, creating a dynamic, organic feel.

# Introduction

---

DeFi should be for everyone and the user should be a part of something they can understand. A transparent and clean project is the thing that creates a supportive community value. The traditional ledger-based exchanges fail to meet the demand. SWAP exchanges answered this question. Do you want to walk this path with us?

Online Cold Wallet is a company with a physical wallet service and SWAP service established in the US and has an operation centre in the UK as the heart of commerce. OCW includes the features that none of the physical wallets around the world offer and provides Trade, Stake, Pool and Farm features to the users. Online Cold Wallet does not want to be confined with it and it also includes a feature that other SWAP companies do not have: simultaneous BSC20 and ERC20 network support!

# MAIN FEATURES

---

**HARDWARE**

**COLD WALLET**

The computers with private keys connected to the internet or the wallets on smartphones will make users' funds vulnerable to numerous attack types. A hardware wallet is like an unbreakable safe with a small gap. Even if someone accesses your hardware wallet, the PIN code will provide you with additional safety.

**BINANCE EVOLUTION PROTOCOL**

**(BEP) -95**

In the last quarter of the year, OCW corresponding to 20% of the profit of that financial calendar will be burned. Although OCW will be created as 10 million in limited numbers different from the equivalent tokens, the burning will continue in the last quarter of each financial calendar until 1 million tokens are left in circulation. The protocol with the real-time token burning mechanism will be implemented in the last quarter of 2022 which aims to accelerate the OCW burning and make OCW more decentralized.

**COMMUNITY BASED**

**PLATFORM**

In addition to high gains with high APR rates, our community plays the largest role. Our community and investors will decide on each innovation and these innovations will be implemented accordingly.

**SAFE & INSURANCE**

**PLATFORM**

Safe Wallet uses CC EAL 5+ government-scale security to keep your cryptocurrency units safe inside a built-in security element.

**EASY**

**PORTABLE**

Connect to your Safe Wallet with the OCW application and send, receive and store your cryptocurrency units, more than 10,000 other cryptocurrencies, collections and tokens.

**SAY GOODBYE TO LOSE**

**YOUR PASSWORD!**

The passwords that enable you to access your crypto wallet is hosted both on the application and OCW synchronization. This way you can say goodbye to losing/forgetting your password.

**NO NEED TO WORRY**  
**ABOUT YOUR PHONE**

Any NFC communication device with OCW application installed and OCW will communicate to ensure uninterrupted access to your assets.

# XCLUSIVE CARD ADVANTAGES

---

- APP + OCW Synchronization
- Custom Wallet
- Cold asset storage
- 6 different networks, single wallet
- NFC contactless payment infrastructure
- NFC encryption APP activation
- My inheritors option
- Whitelist for OCW platform IDO/IFO events

# Tokenomics

## Total Supply

10.000.000

## Pre-Sale

1.000.000

## Initial Roaming Reserves

2.000.000  
(until the end of 2022)

## Circulate Every Year

500.000
